

**Associate Professor Abbas Rajabifard** is President of the GSDI Association, Director of the Centre for SDIs and Land Administration at the Department of Infrastructure Engineering, the University of Melbourne and is a member of Victorian Spatial Council, Australia.

He is a member of ICA-Spatial Data Standard Commission and was Vice Chair of Spatially Enabled Government Working Group of the UN sponsored Permanent Committee on GIS Infrastructure for Asia and the Pacific (PCGIAP). His current research and interest are spatially enabled government and societies, design and management of sustainable cities, and integration of SDI and land administration and development of seamless SDI (land and marine) models.

He has published broadly on SDI, land administration, and spatially enabled societies. In recent years he has focused more on the design and development of SDIs for different applications and in different jurisdictions including virtual jurisdictions such as Virtual Australia. He provides academic and research leadership in the Centre for SDIs and Land Administration;
